Execution of less, more and vi Commands in Kali Linux

1. AIM

To execute and understand the less, more, and vi commands in Kali Linux and observe their outputs.

2. ALGORITHM / PROCEDURE

1. Open Kali Linux and launch the Terminal.
2. Create a sample text file by executing: printf 'Line 1\nLine 2\nLine 3\n' > notes.txt.
3. Execute less notes.txt to view the file page by page. Press q to exit.
4. Execute more notes.txt to view the file one screen at a time. Press q to exit.
5. Execute vi notes.txt to open the file in the vi text editor.
6. Press i to enter insert mode and make a small change if required.
7. Press Esc, type :wq, and press Enter to save changes and quit the editor.
8. Observe and record the output of each command.

3. COMMANDS AND DESCRIPTION

a) less command

Command: less notes.txt

Displays the contents of a text file and allows navigation forward and backward. Press q to quit.

b) more command

Command: more notes.txt

Displays text one screen at a time. Press Space to move forward and q to quit.

c) vi command

Command: vi notes.txt

Opens a text file in the vi editor. Press i to insert text, Esc to leave insert mode, and :wq to save and quit.

4. OUTPUT SCREENSHOTS

The following are illustrative terminal output screenshots for the lab record. Run these commands on your Kali Linux system and replace the examples with actual screenshots if your instructor requires genuine captures.

a) less command output

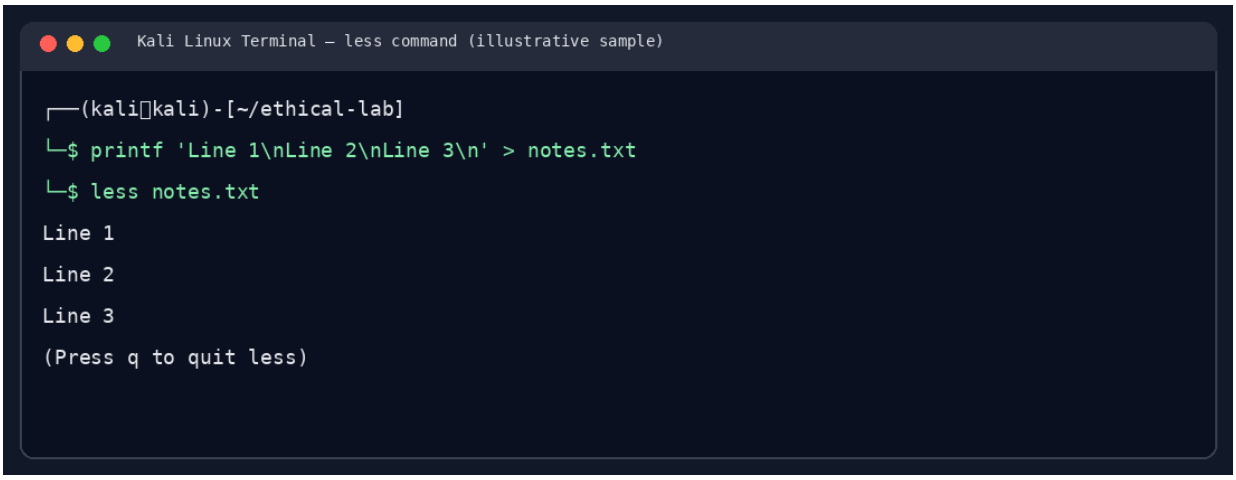

Figure 1: Sample output of the less command.

b) more command output

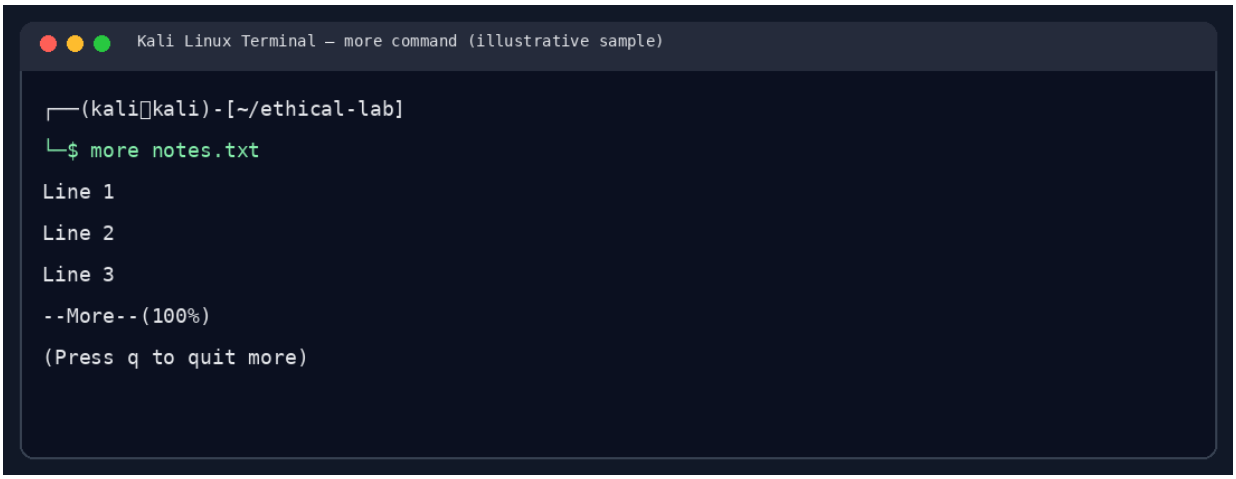

Figure 2: Sample output of the more command.

c) vi command output

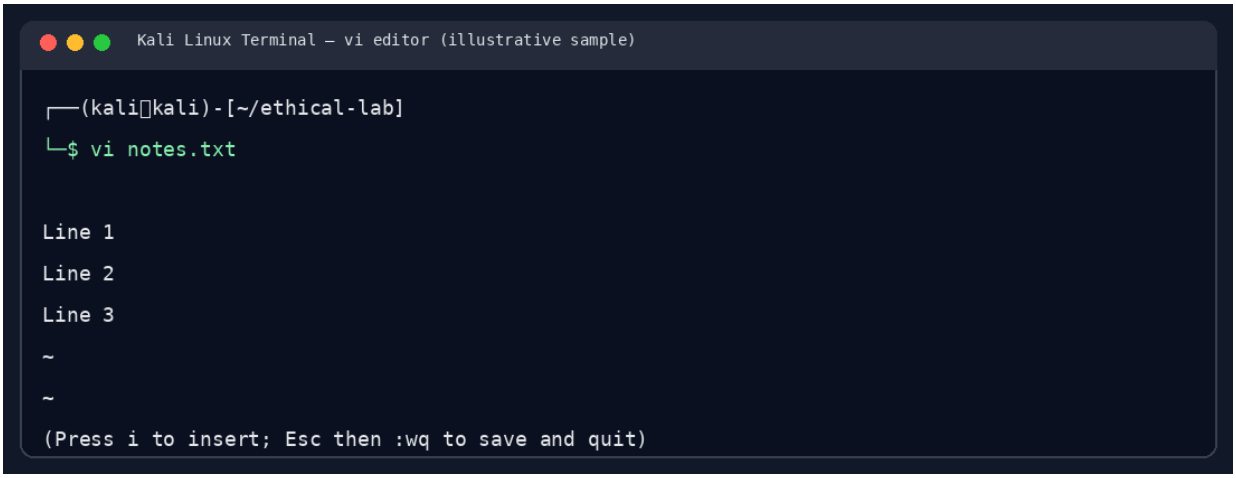

Figure 3: Sample vi editor screen.

5. RESULT

Thus, the less, more, and vi commands were studied in Kali Linux. The less and more commands are used to view text files, while the vi command is used to create and edit text files.
